

"Convert GSP Files From MS-Project 2003 (MDB) to MS-Project 2007 (XML)"

If you have worked with MSP 2003 and now want to use MSP 2007 you have to convert the GSP file.

This dialog box lets you generate copies from your Microsoft Project 2000/2002/2003 GSP and IFT files which you can use with Microsoft Project 2007.

You can invoke this dialog box only if no graphics specification has been loaded.

For detailed information please see chapter 6.85 **The Convert GSP files from MSProject MDB format to MSProject XML format dialog box** in the GRANEDA Dynamic User's guide
