

How to ... show simulated production orders

In order to show also the simulated production orders, you need to make the following change to the XMLPort:

XMLport: 80830/5416000 - NETRONIC VPS Export

Function: ProductionOrder - Export::OnPreXMLItem()

Please replace the following line:

```
"Prod. Order Line".SETFILTER(  
    Status,'%1|%2|%3',"Prod. Order Line".Status::Planned,"Prod. Order Line".Status::"Firm Planned",  
    "Prod. Order Line".Status::Released);
```

and use instead:

```
"Prod. Order Line".SETFILTER(  
    Status,'%1|%2|%3|%4',"Prod. Order Line".Status::Simulated,"Prod. Order Line".Status::Planned,"Prod. Order  
Line".Status::"Firm Planned",  
    "Prod. Order Line".Status::Released);
```
